
Off-Highway Research

The Indian Database Service

A Subscription Service

THE INDIAN DATABASE SERVICE

Off-Highway Research's Indian Database Service is available on an annual subscription basis, providing detailed analysis of the national equipment market. It provides sales and production data by OEM for 18 products.

Our intuitive database package allows clients to quickly and easily build searches, making market analysis a fast and efficient task. Data is updated and forecasts refined at least twice per year, giving subscribers access to the latest market intelligence and outlook.

Included in the Indian Database Service is our Indian Annual Review, which is published every April. This report, which sells to non-subscribers for more than US\$1,000, provides context and analysis to the wealth of information in the database.

Our standard single-site licence allows for up to five individual users based in one location. If you require further access rights, please enquire about our multi- and global-site licence packages.

THE SERVICE OFFERS:

- Sales by company, by product since 2002
- Production by company, by product since 2002
- Five-Year sales forecast by product

APPLICATIONS

- Establish market sizes, trends and forecasts by product type
- Analyse market shares
- Competitor analysis
- Component manufacturers use production data to target their customers – the OEMs
- Identify market opportunities
- Create machine population models

ACCESSING THE SERVICE

Access to Off-Highway Research's databases is via our online client portal. The databases are also available as a bespoke PC software download for offline working. Both versions allow clients to manipulate data and export it directly as an Excel worksheet or as a delimited flatfile for easy integration with other analytical tools.

Off-Highway Research's Database Services are available in Chinese, English, French, German, Japanese, Italian and Spanish.
